React | Node | JavaScript | Python | Express | HTML | CSS | SQL

PROJECTS

MediCool   **View GitHub**
MediCool is a drug prescription app that makes it easier for users to keep track of their drug usage and schedule.
React | Redux | CSS | Ant Design
- Worked on the frontend of this project alone by consuming a well-documented API.
- Made use of React Router to make it a Single Page Application
- Used plain CSS for the styling of the landing page and Redux for state management.

Decksify (Distributed team of 6 from across Africa and Europe)   **View GitHub**
A flashcard application to make everybody's study-session more effective, while saving them time and money.
React | Redux | Ant Design
- Collaborated with 6 other developers from distinct parts of Europe
- Created the user login flow using ant design's custom components for UI and validation
- Worked on the ability of an authenticated user to create, update, and delete flashcards from a deck.

Restaurant Passport   **View GitHub**
With this app, you can find restaurants within a city to satisfy your urge for food.
React | Redux | Ant Design | CSS
- Completed project independently in a few days, using already documented endpoints to build the frontend
- I implemented CRUD functionality using Redux as a state management system
- I designed the user authentication workflow and made it fully functional
